gregory

A proudly Australian owned company providing Ergonomic Office and Commercial Furniture Solutions. Gregory Commercial Furniture specialises in creating original and unique ergonomic seat technologies for office chairs. From ergonomic office chairs to visitor seating and lounges, Gregory has the solution for you.

about

At Gregory Commercial Furniture we consider the intricate harmony of the human body to be critical to performance. We strive to preserve this balance, aiming to prevent any damage resulting from sitting incorrectly for long periods of time. To this end we are guided by a philosophy of body centred design.

Our approach does not simply finish with a chair adapted to support your frame. We employ a holistic philosophy to design, extending ergonomics to encompass your entire well-being.

Our first chair was developed in 1988 by physiotherapist and company founder, Peter Gregory, to address the largest cause of occupational back pain in Australian office workers - the office chair. His knowledge of the anatomical reasons for chronic back pain and his precise observations of correct seating posture, led to the development of our award winning Dual Density Posture Support System.

Since then we have gone on to develop a further four ergonomic seat technologies including the newly launched Dual Density MkII to create our most advanced ergonomic seating technology to date.

solutions

Gregory continues to be the leader in innovative ergonomic design, quality and manufacturing, with a comprehensive range of seating solutions. Our seating range has been designed to be a complete solution for our customers by reducing workplace health and safety risks, increasing productivity, incorporating modern design and finishes and delivering great customer service. Our product ranges include:

- › Task seating
- › Executive seating
- › Visitor seating
- › Lounge seating
- › Health and Aged Care seating
