ACCESS POD
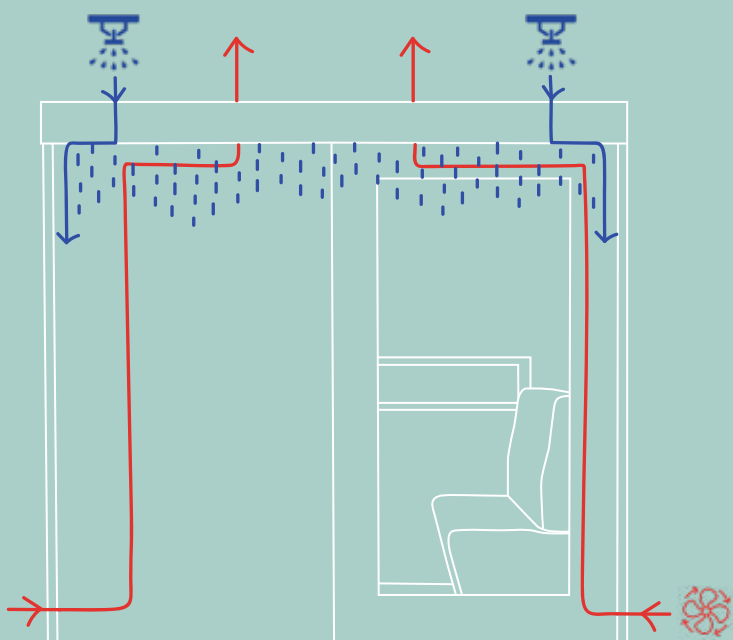

Booths should be accessible ♿

ACCESS POD

Gregory's ACCESS Pod is the first portable acoustic office both designed specifically for wheelchair access and compliance with building fire sprinkler requirements.

We understand that your employee's health and safety in the new "normal" COVID-19 environment is a top priority and its ours too. For this reason, Gregory's ACCESS Pods come with optional HEPA filtration and a commercial grade UV Steriliser options.

The ACCESS Pod is an innovative Australian registered design and manufactured locally and available in your choice of finishes.

Soft close sliding door

Most booths are not compliant with the Disability Discrimination Act (1992) and Fire Compliance Regulation and are therefore illegal to install in multi-story buildings.

Gregory's ACCESS Pod is wheelchair accessible, utilises a soft close sliding door and has accessible handles for all users.

The ACCESS Pod is the only acoustic booth system designed specifically for use in compliance with building fire sprinkler requirements.

The special roofing design of the ACCESS Pod is designed to enable sprinkler water-flow, without special plumbing.

*Air flow and fire sprinkler access
