Manufactured
in Australia

ACOUSTIX POD

Gregory's ACOUSTIX Pod is the first portable acoustic office booth designed specifically for wheelchair access and the only booth compliant with building fire sprinkler requirements.

We understand that your employee's health and safety in the new "normal" COVID-19 environment is a top priority and it's ours too. ACOUSTIX Pod has a dual fan circular airflow system designed to maximise air exchange rates and to create gentle airflow within the booth. Optional HEPA Filter.

The ACOUSTIX Pod is an innovative Australian Registered Design and manufactured locally and available in your choice of finishes.

*Circular air flow system & fire sprinkler access

Wheelchair access sliding door (DDA)

No imported booth is compliant with the Disability Discrimination Act, without adding a ramp and Fire Compliance Regulation and are therefore illegal to install in multi-storey buildings.

Gregory's ACOUSTIX Pod is wheelchair accessible, utilises a soft close sliding door and has accessible handles for all users.

The ACOUSTIX Pod is the only acoustic booth system designed specifically for use in compliance with building fire sprinkler requirements in multi-storey buildings.

The special roofing design of the ACOUSTIX Pod is designed to enable sprinkler water-flow, without special plumbing.

ACOUSTIX Pod is the only booth with the option to be fitted to the building's air conditioning ducts.

FEATURES

FEATURES	STANDARD	OPTIONAL	IMPORT
Soft touch sliding door for wheelchair access	.		
No step up floor	.		
Sprinkler permeable ceiling design	.
